Dreamweaver

Our one-day introduction to **Macromedia Dreamweaver** is **for new or prospective web designers** wishing to create websites with the help of this leading professional software. After completing this course, students will be able to create websites that include frame-based pages, tables, graphics, and links.

Participants should have a basic understanding of an operating system: for example, how to launch an application, create and save files and copy files from CDs and other media.

Course Objectives

- Explain basic concepts about the Internet and the World Wide Web, identify the basic issues concerning proper site design, and navigate in the Dreamweaver work environment.
- Define a site in Dreamweaver to organize and maintain the Web pages; and create a basic Web page by typing text and applying character and paragraph formatting.
- Use Site Panel to create and organize files and folders.
- Insert images, set image properties, create and format tables.
- Add links within a site, create anchors, and specify external links, as well as use images as links, and create image maps.
- Build a frame-based set of pages.
- Upload a site to a remote Web server.

Course Content
